

Colorado/Wyoming Turners

Industrial Sciences Wood Lab -West Laurel ST. • Fort Collins, CO

December 4, 1994

Dear Turner:

31 people attended the November 10 meeting; an outstanding show of interest in our new organization. The raffle raised \$61.50 to offset newsletter expenses. The focus of the meeting was future agendas. The next seven meetings will be held on the second Thursday of each month at 7pm. Topics for the meetings will be as follows;

<u>Date</u>	<u>Topic</u>	<u>Presenter</u>
December 8	Boxes & hollow vessels with emphasis on Christmas ornaments	
January 12	Chucking techniques	Lee Carter
February 9	Segmented turning	Kurt Theobald
March 9	Sharpening	Dave Nittman
April 13	Finishing	Gene Wentworth
May 11	Carving	Dick Branecki
June 8	Design	David Nittman

Areas of interest for future meetins include inlay, reverse turning, finding/seasoning wood, making tools, chain saw techniques, multi-axis turning, basic tool handling, and decorating vessels. We decided to alternate monthly topics between basic and advanced techniques to address the interests of all attending. We will continue our "show and tell" time next month. In addition to a main topic, it has been suggested that we include a short presentation each month. Jerry Smith volunteered to do this in December. Doc Thode concluded the meeting with another approach to turning spheres. Thanks Doc.

For the Decenber meeting, bring something for the raffle, show and tell, and YOUR OWN NAME TAG.

See you then,

Dave Nittman & Linda Ellison
