

Colorado/Wyoming Turners

Industrial Sciences Wood Lab -West Laurel ST. • Fort Collins, CO

January 6, 1995

Dear Turner:

Attendance at our club meetings continues to grow. Welcome to the new faces. At the December meeting Jerry Smith gave a presentation on segmented turning and "Doc" Thode gave a presentation on hollow turning. Thanks for the excellent information. Several club decisions were also made at the December meeting. An "official" club name will be selected in January. Membership dues have been set at \$12 a year, and Trent Bosch has agreed to be treasurer. Starting in February, this newsletter will be mailed only to paid club members, so come prepared to pay membership dues at the January meeting.

The January meeting will be an eventful one. The financial statement for the woodturning symposium held last June at CSU is complete. A check from AAW/Front Range Woodturners Association to establish a scholarship fund for Industrial Science Technology majors will be presented at the beginning of the January 12 meeting. The video tape of the symposium is also available and will be shown at 6:15pm prior to the meeting.

Following a short business meeting at 7:00pm, Lee Carter will give a presentation on techniques/procedures for mounting stock on the wood lathe. A wide variety of chucking methods will be demonstrated, including: Jam, screw center, pin, spigot, dovetail, vacuum, collet, 6-1 as well as a variety of accessories that can be adapted to chucks. Various mandrel and unique techniques for mounting stock will also be demonstrated.

Topics for future meetings have been planned as follows:

<u>Date</u>	<u>Topic</u>	<u>Presenter</u>
February 9	Segmented turning	Kurt Theobald
March 9	Sharpening	Dave Nittman
April 13	Finishing	Gene Wentworth
May 11	Carving	Dick Branecki
June 8	Design	David Nittman

For the January meeting, bring something for the raffle, show and tell, and YOUR OWN NAME TAG.

See you there
Dave Nittman & Linda Fellion
